Election/Restrictions

This application contains claims directed to the following patentably distinct species: There are numerous species. There are several elements of the invention that have more than one specie. For example, there are more than one embodiment of clutch disclosed. Also, the outer carriage, inner carriage, raise/lower mechanism, folding accumulator, etc., have more than one specie each. Applicant must select one specie from each applicable group, taking care that each specie chosen is compatible with each other. The species are independent or distinct.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claim is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which depend from or otherwise require all the limitations of an allowable generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species.

MPEP § 809.02(a).
